Software Development thru Value-added
full life cycle Software Testing*

About T&M Testes de Software

T&M Testes de Software is Brazil's leading provider of in-house/out-house in-shore/off-shore Software Testing Services with an emphasis on innovative means of Quality Design, Assurance and Quality Control in the Banking & Telecommunications Industry.

Our customers include Citibank, HSBC, Merrill Lynch, Deutsche Bank, ABN Amro, CARDIF, DATASUL, Dell as well as Brazil's mayor banks Itaú, Bradesco, Unibanco and BM&F who expect nothing less than Better, Faster and Cheaper Testing from T&M.

And we deliver it, we have a 97%+index of customer re-engagements and offer 3 Sigma (99,87%) Contractual Test Effectiveness as our standard performance at highly competitive prices.

The company is headquartered in São Paulo, Brazil, is currently engaged in its CMMI certification, maintains its own Testing University (www.ibqts.com.br) with International Test Curricula and Professional Test Certification and uses state-of-the art management and operational best test practices tailored to our customers maturity levels and culture.

We help our customers meets their deadlines, budget constraints and quality expectation thru our META Test Methodology, awarded as "Best Test Methodology for the Financial Market (2005)" coupled with highly skilled and test certified resources with multi-domain and multi-technology experience, extensive test automation (Mercury&Rational tools – when there is a clear payback for it) and a fresh and innovative approach to each and every test engagement.

We are engaged in multi lingual, multi-cultural and multi million dollar projects from as small as a 3-4 dedicated test team to +70 teams on 200.000 hours projects both as dedicated test teams as in short-term test projects. We work under our own test management or integrated with our customers test teams.

We Test the full product life cycle - from Business Requirements Testing to Release Testing – and provide extensive product and process metrics to support our customers decision making.

Our Test Engagements include Messaging Systems (SPB, SWIFT, FIX protocols), Embedded software Testing (mobile, satellite tracking systems, voting systems, POS's and ATM's), mainframe and web based applications (Banking, Brokerage, Credit Card,...) and we are proud of being able to quickly grasp our customers business needs and transforming it in a winning test process tailored for each specific test engagement.

Our moto says it all: "Quality Testing does not happened by accident, It's the Result of an Intelligent Effort".
